

Anabec Advanced Cleaning Solution

A biofilm is a community of microorganisms attached to a solid surface. Anabec's Patented Biofilm Busting formula the "Advanced Cleaning Solution" eliminates the biofilm and food source leaving an extremely hygienic surface.

"The removal of the biofilms, a safe haven for microorganisms, is accomplished by Anabec's cleaner. The cleaner's oxidizing agents and scrubbing detergents successfully disrupt fungal, bacterial and viral microorganisms. With this disruption of the organism's defense mechanisms and cell membranes, the cleaner successfully removes the biomass right down to the substrate."

Before Anabec Advanced
Cleaning Solution

After Anabec Advanced
Cleaning Solution

Characteristics & Benefits

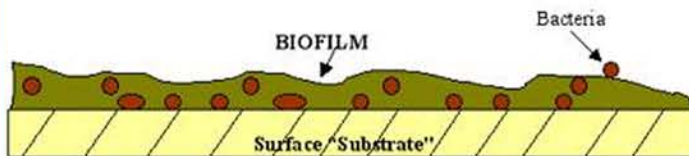

- Denatures the thicker cellular structured species of mold and bacteria
- A surfactant with mechanical action for maximum material penetration
- Specially designed to remove allergen causing agents

Five, Ten and Twenty Year Written Warranties When Applied with
our Microbial Shields and by a Trained Applicator*

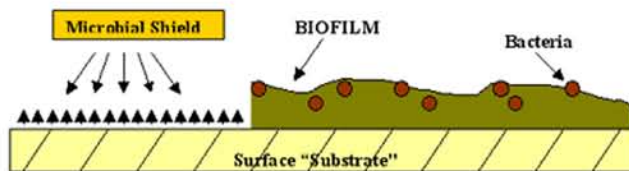

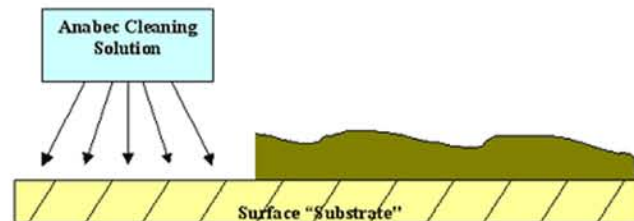

Anabec Advanced Cleaning Solution

How Anabec Works

The stronger strains of mold and bacteria attach themselves to surfaces within colonies called biofilms. Biofilms are essentially places where organisms can hide. A biofilm community can include bacteria, fungi, yeasts, protozoa and other microorganisms. When an organism is within the biofilm it is all that more difficult to reach and at that point are extremely difficult to eradicate.

Anabec's Cleaning Solution successfully eradicates the biofilm. The Biofilm is the lifeline for mold and bacteria. Anabec disintegrates the biofilm and agglomerates the mold and bacteria, denaturing their protein cellular structure.

The final step is to apply one of our three shields, Anashield, X-70 or X-70 Plus. These shields provide long-term protection against mold and bacteria growth on the treated surface. Certified Anabec applicators have warranties on all Anabec systems.

Information & Procedure

| | |
|--------------------|--|
| Application | Airless Sprayer with Tip Size .009 - .013 |
| Surfaces | Porous & Non Porous Building Surfaces, Carpeting, Upholstery, Ceiling Tiles, Wood, Brick, Etc. |
| Coverage | 1,000 Sq. Ft. Per Gallon Coverage |
| Dry | 1 Hour to Touch |
| Clean-up | Soap and Water |
| Color | Clear |
| Warranty | When Applied With One of Anabec's Second Step Products by a Trained Applicator |
